EDUCATION

Ballari Institute of Technology and Management
B.E. in Computer Science and Engineering (Data Science)

Ballari, India
CGPA: 9.00 / 10.00

TECHNICAL SKILLS

- **Programming Languages:** Python, C, C++
- **Libraries & Frameworks:** NumPy
- **Developer Tools:** Jupyter Notebook, VS Code, Turbo C

PROJECTS

Online Auction System | *Python*

[GitHub](#)

- Developed a menu-driven Python application designed for item listing, bidder registration, bid placement, and automatic winner selection.
- Implemented core features using Python data structures including dictionaries, lists, functions, and conditional logic.

Term-Life Insurance Management System | *C*

[GitHub](#)

- Developed a mini-project to streamline the management of term life insurance policies.
- Processed customer details including name, age, sum assured, and policy duration to calculate annual premiums dynamically based on age parameters.
- Designed clean interfaces to display comprehensive policy details, total premiums paid across policy terms, and overall sum assured.
- Utilized structural C concepts such as structures, functions, pointers, conditional statements, loops, and switch-case logic.

ACHIEVEMENTS & EXTRACURRICULARS

- **Smart India Hackathon (SIH):** Proposed a tech-based framework for flood prediction and risk assessment leveraging rainfall patterns, soil moisture data, and geographical indicators.
- **Hackathon – Aqua Route:** Engineered a conceptual solution to map suitable water-flow channels during severe flood events to mitigate urban waterlogging.
- **Debate Competition:** Secured 2nd Place in competitive debate.
